

Anatomia de um Grid

Exemplo de Grid 6x6 (6 linhas x 6 colunas)

Propriedades: *align-items*, *justify-items*, *align-content* e *justify-content*

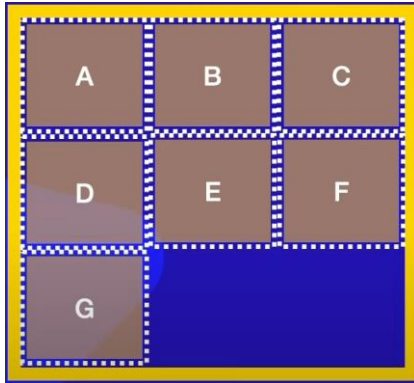

Dada a seguinte estrutura HTML:

```

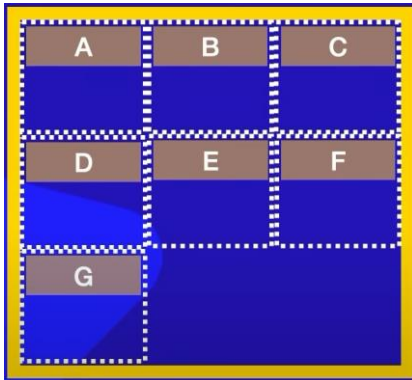

<div class="container">
  <div class="item">A</div>
  <div class="item">B</div>
  <div class="item">C</div>
  <div class="item">D</div>
  <div class="item">E</div>
  <div class="item">F</div>
  <div class="item">G</div>
</div>

```

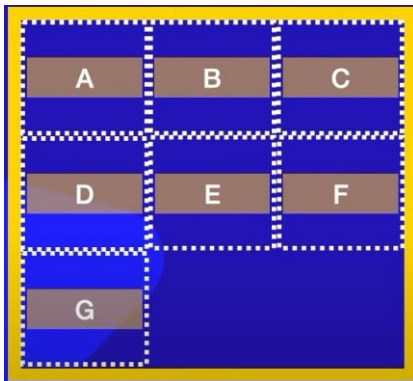

Propriedades do **align-items** (remanejamento das *divs* filhas na **vertical**):

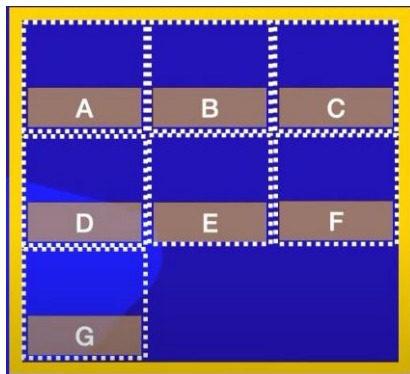

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
}
```

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: start;  
}
```

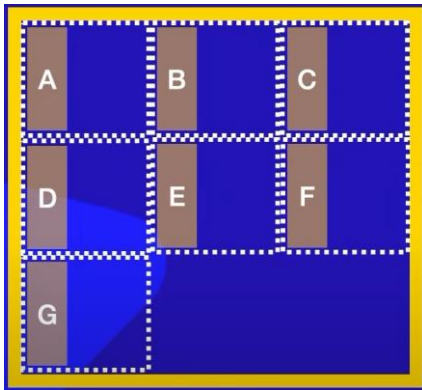

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: center;  
}
```

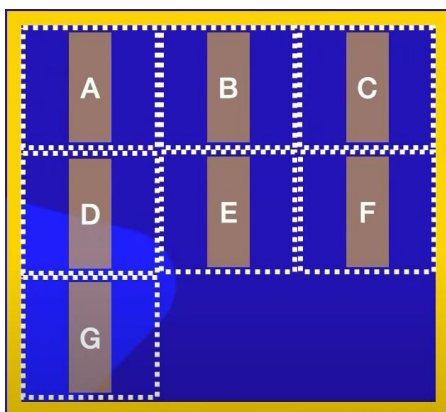

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: end;  
}
```

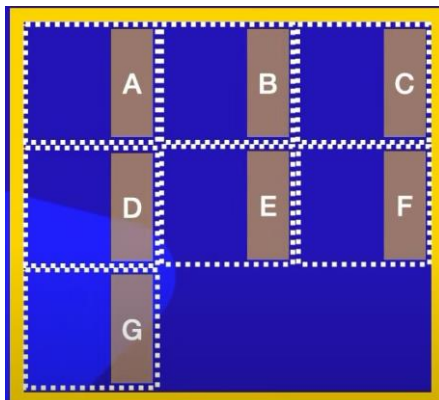

Propriedades do **justify-items** (reanejamento das *divs* filhas na **horizontal**), considerando os demais comandos como normal:

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: start;
```

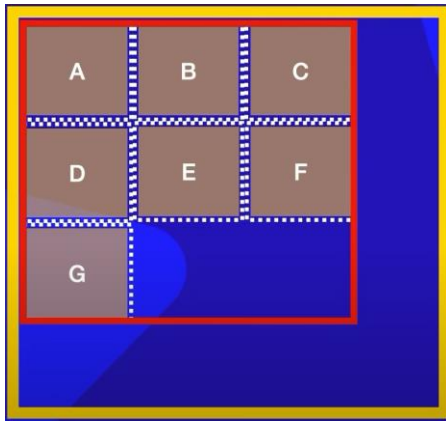

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: center;
```

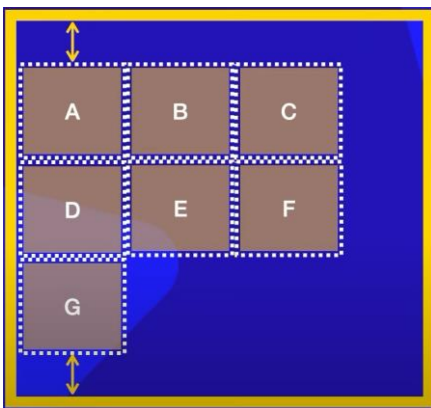

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: end;
```

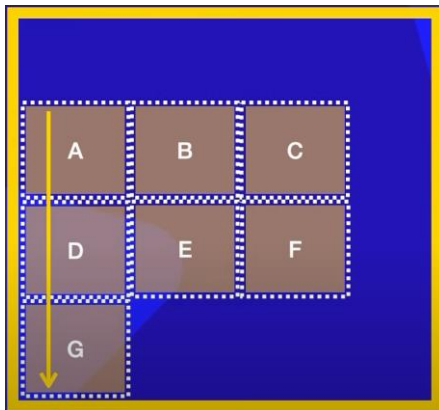

Propriedades do **align-content** (remanejamento por completo dos conteúdos dentro do container na **vertical**):

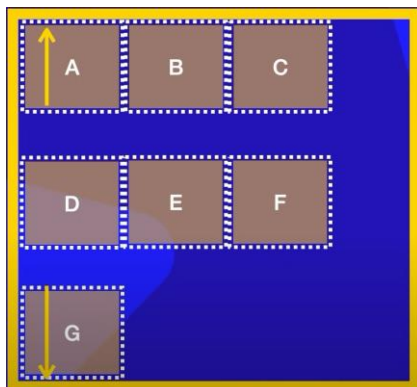

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: start;
```

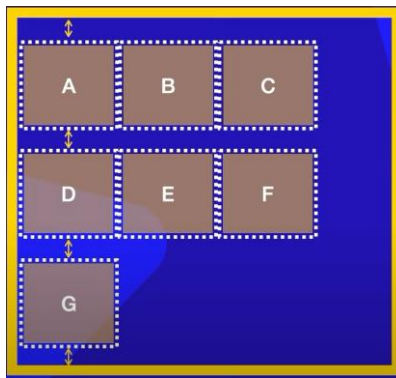

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: center;
```

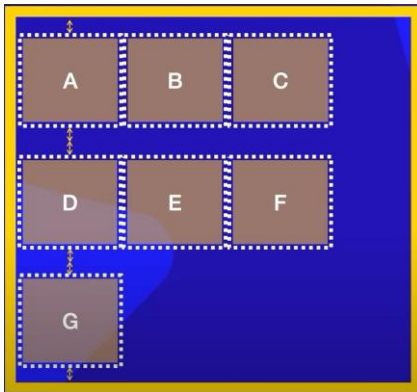

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: end;
```

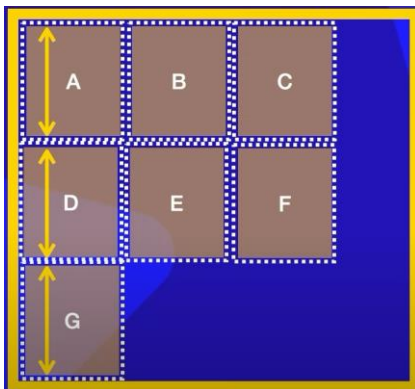

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: space-between;
```

```
div.container {
  display: grid;
  grid-template-columns: auto auto auto;
  grid-template-rows: 100px 100px 100px;
  align-items: stretch;
  justify-items: stretch;
  align-content: space-evenly;
```

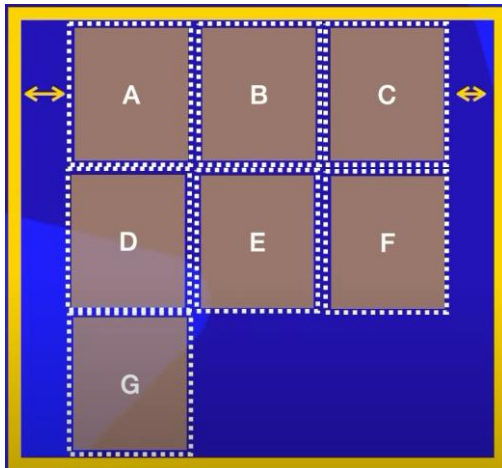

```
div.container {
  display: grid;
  grid-template-columns: auto auto auto;
  grid-template-rows: 100px 100px 100px;
  align-items: stretch;
  justify-items: stretch;
  align-content: space-around;
```

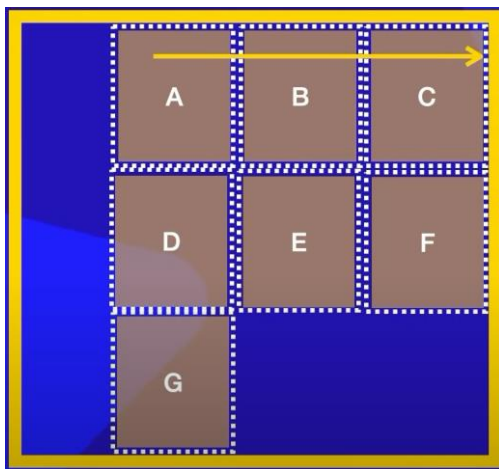

```
div.container {
  display: grid;
  grid-template-columns: auto auto auto;
  grid-template-rows: 100px 100px 100px;
  align-items: stretch;
  justify-items: stretch;
  align-content: stretch;
```

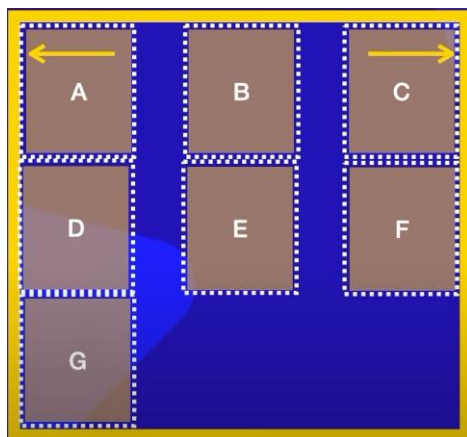

Propriedades do **justify-content** (remanejamento por completo dos conteúdos dentro do container na horizontal):

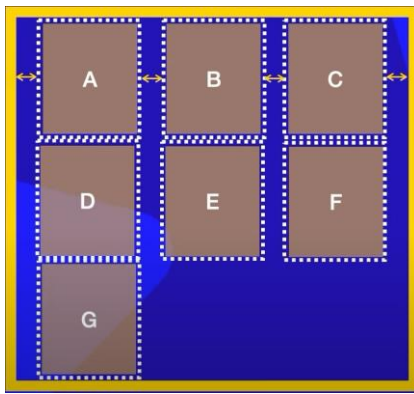

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: stretch;  
  justify-content: center;  
}
```

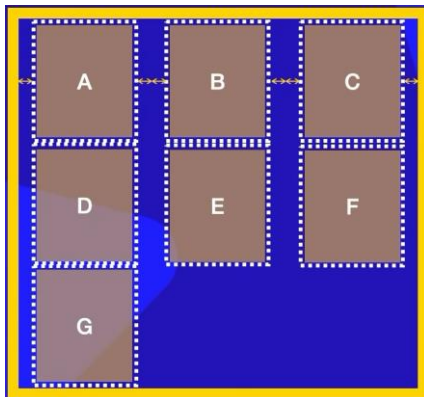

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: stretch;  
  justify-content: end;  
}
```

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: stretch;  
  justify-content: space-between;  
}
```

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: stretch;  
  justify-content: space-evenly;  
}
```

```
div.container {  
  display: grid;  
  grid-template-columns: auto auto auto;  
  grid-template-rows: 100px 100px 100px;  
  align-items: stretch;  
  justify-items: stretch;  
  align-content: stretch;  
  justify-content: space-around;  
}
```
